Furniture for Condominiums: Height Adjustable Island

In small condominiums there is often not enough space for both a dining room table and a functional amount of counter space within the kitchen.

This height adjustable island solves that problem. With the push of a button it can be set to dining, counter or bar height.

Furniture for Condominiums: Height Adjustable Island

Dining Height: 26"-29"

Counter Height: 36"

Bar Height: 40"-45"

The narrow base of the height adjustable island is securely fastened to the floor allowing for leg room when being used as a table.

Height is adjusted by way of an electric switch that controls a set of quiet internal motors that move the counter top.

Furniture for Condominiums: Height Adjustable Island

The counter is 32" deep and available in three widths: 60", 66", and 72".

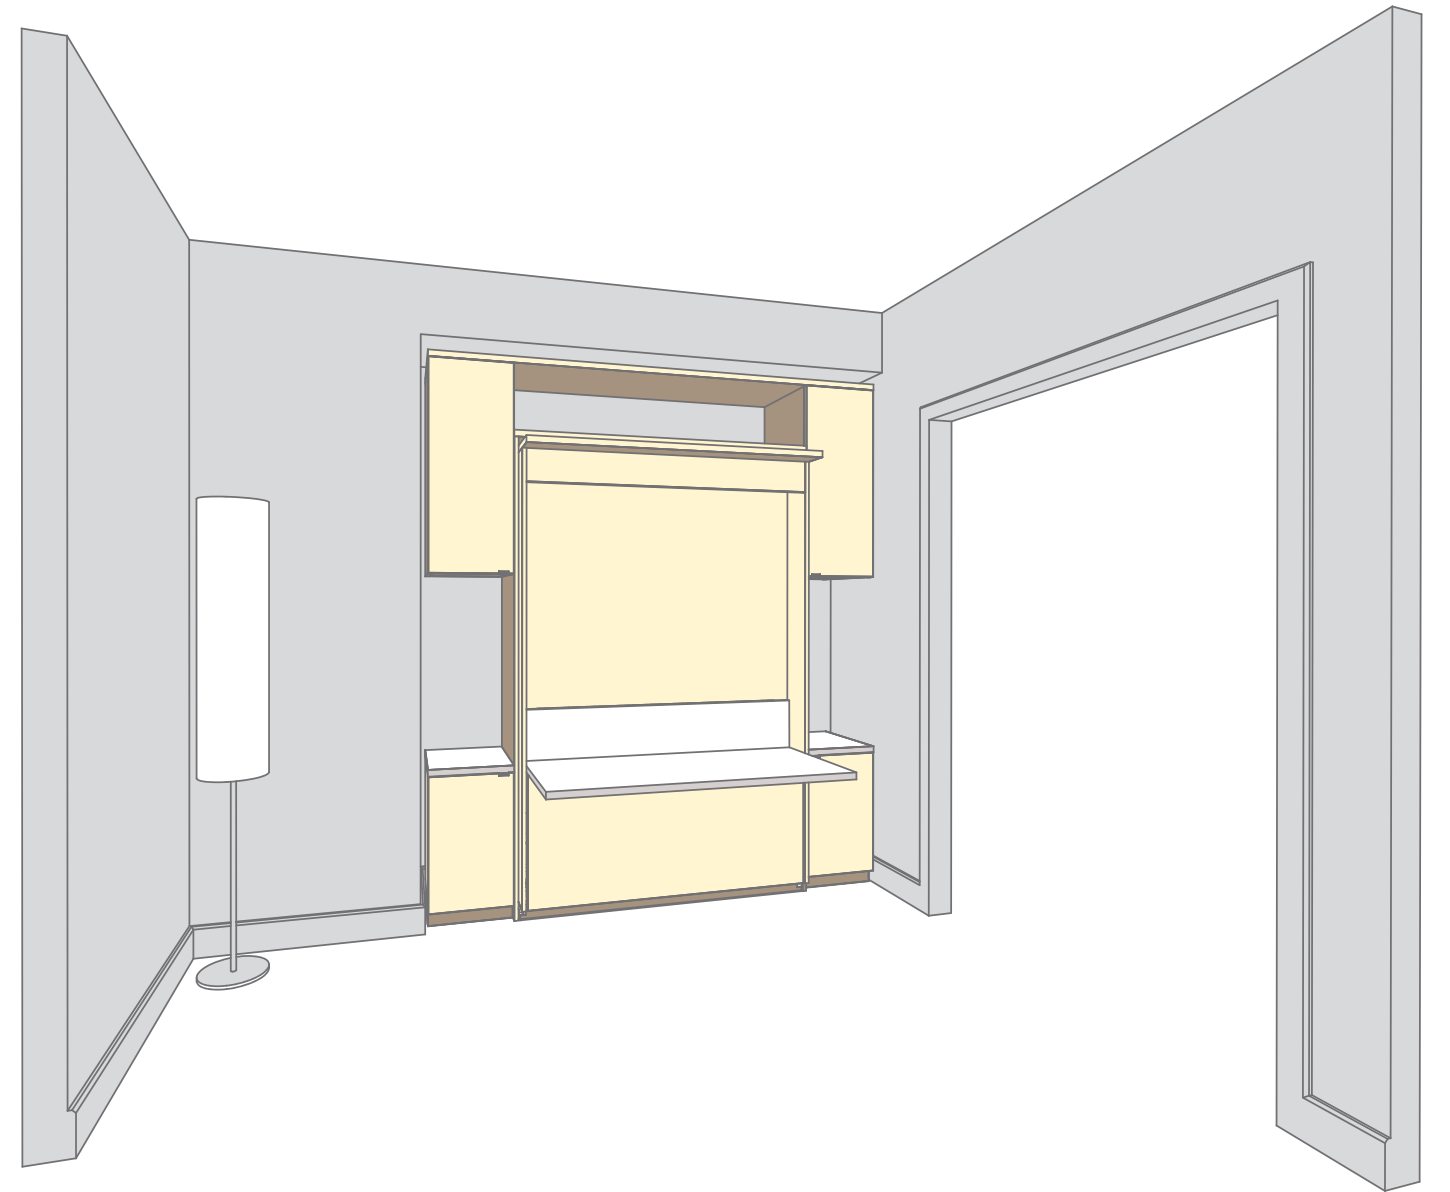

The island can be specified in a wide variety of finishes that match or coordinate with those in the condominium kitchen, such as granite or quartz for the counter top and laminate or wood veneer on the base.

Furniture for Condominiums: Folding Desk Bed

Furniture for Condominiums: Folding Desk Bed

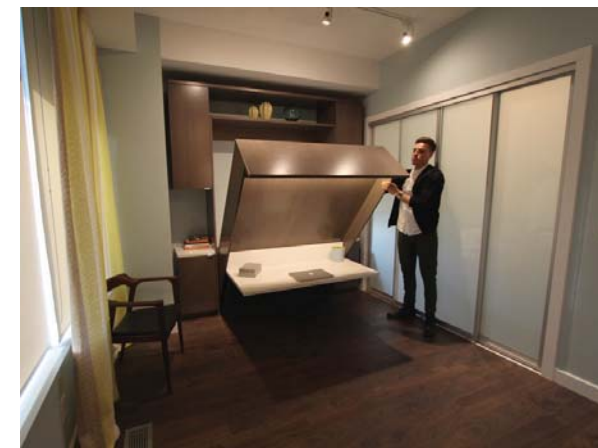

The folding desk bed adds utility to the condominium den or small bedroom.

A cantilevered desk projects from wall cabinetry when the bed is stowed, but stays parallel to the floor as the bed is lowered.

Full cabinets

Lower cabinets

No cabinets

The bed can be specified with both upper and lower cabinets, just lower cabinets or no cabinets.

The integral valence desk lighting is also an option.

Furniture for Condominiums: Folding Desk Bed

Finishes on the cabinet tops and desk can be specified separately from those on the bed and cabinets.

These finishes can be chosen to match or compliment other finishes in the condominium, laminates and wood veneers as well as some painted colours are available.

Furniture for Condominiums: Low Profile Closet

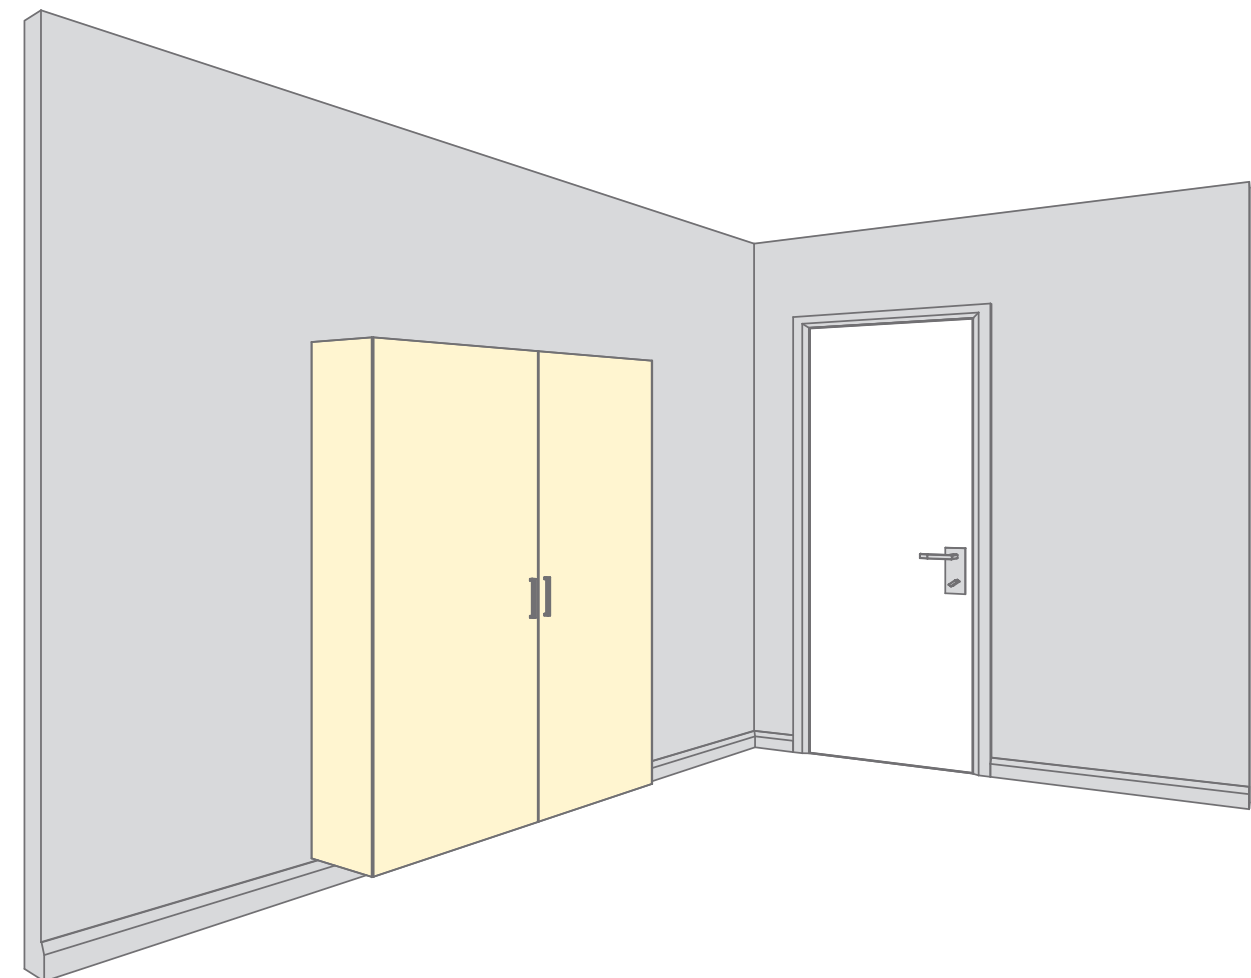

Furniture for Condominiums: Low Profile Closet

The low profile closet is ideally suited to layouts where it is difficult to find space for clothing storage near the front entrance.

It projects only 10" off the wall into the entrance area by hanging clothing in a space efficient way, holding up to eight large coats.

Furniture for Condominiums: Low Profile Closet

When open, it provides full visibility and access to the items stored within.

It has a storage volume comparable to that of a standard closet and an interior shoe storage box that can be used as a bench.
